For your safety and the safety of others, evacuation procedures must be followed by all occupants of this campus in the event of an emergency or when authorised wardens are directed by the Chief Warden to undertake an evacuation.

To Evacuate

In the case of an evacuation, all students, visitors and contractors must immediately proceed to the assembly area associated with the building they are located in at that moment (Refer to map).

Evacuation Sequence

1. Proceed to your nearest exit within the building (Exits are clearly defined).
2. Proceed to the designated assembly area for the building you have moved from (areas clearly defined on map).
3. Remain at the assembly area until the "all clear" signal is given and you are advised by the Area Warden and/or First Aid Officer that you may return to the location you previously vacated.

Lecturers

1. Collect roll/time book.
2. Check attendance record against students present at the assembly area.
3. Report to Area Warden at assembly area that your class is accounted for/or persons are missing.

The Occupational Safety and Health Act 1984 and Regulations 1996 clearly identify that employers, employees, self employed persons, apprentices/trainees and students "All shall take reasonable care to ensure his/her own safety and health at work". Help us protect your well-being by knowing what to do in any emergency and always follow the directions of the Area Wardens appointed to guide you to safety during an evacuation.
